

Copying or Moving Pictures from the Camera Memory Card to My Pictures

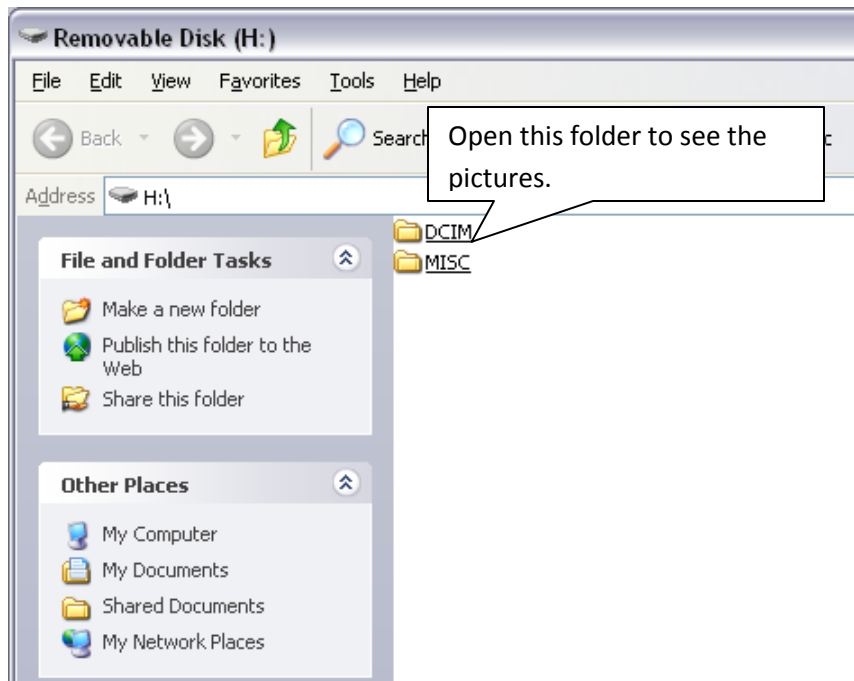

Removed the SD card from the camera and insert it into the SD card slot on your printer or computer

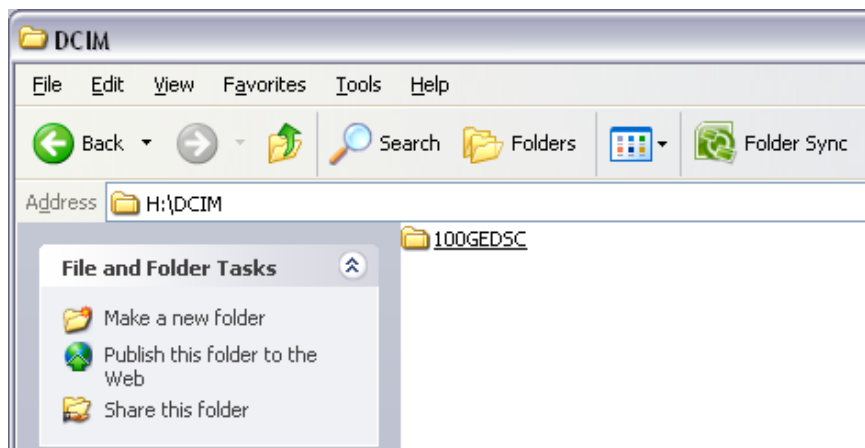

When the card loads you should see a little window that looks like this:

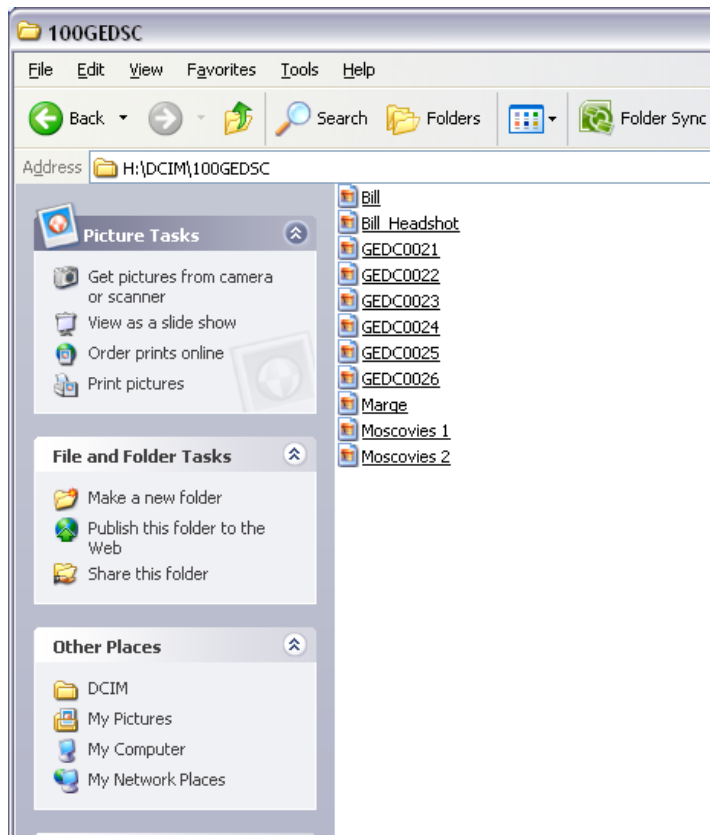

When you select "Open folder to view files" and click OK you should see:

Some cameras has an additional folder, but you should only see one.

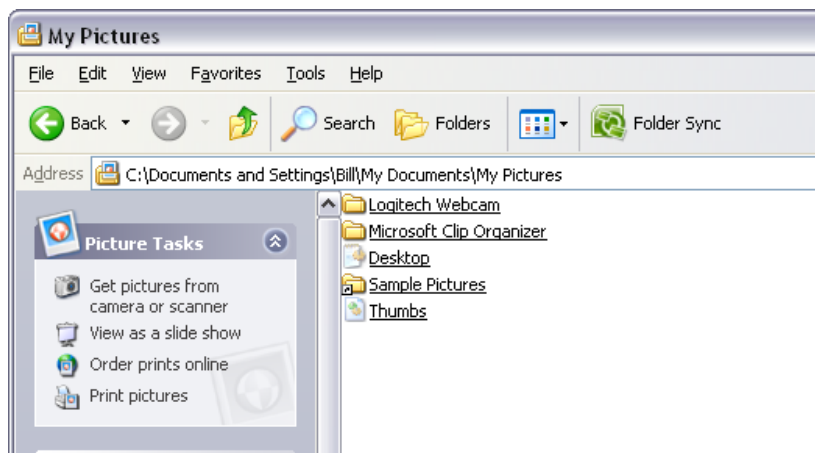

Open this folder to see the pictures

Double click on the “My Documents” folder to open it

Then Double click on My Pictures folder

You can then drag and drop from the DCIM card into the “my pictures” folder, make a new folder and then drag them and drop them there. Or you can press Ctrl+A to select all the photos in the DCIM folder and move them all at the same time.
